

M/D

Marlon Demas

SUMMARY

I am a Cape Town based software engineer with experience in full-stack web-development. I am pragmatic with a very positive attitude and I am always looking to be challenged. I learn concepts quickly and thrive in a fast-paced environment. I am also easy to talk to, reliable and focused.

EXPERIENCE

March 2021 – October 2021

Junior Web Developer • Longbeard • Italy

March 2019 – November 2021

Software Developer • Adept ICT • Cape Town, South Africa

January 2017 - June 2018

Waitron • Panarottis • Cape Town, South Africa

I worked part-time for Longbeard, and there I did mainly bug fixes and enhancements. At my full-time job at Adept, I did mostly frontend coding but have been tasked with backend as well as our team has gotten smaller and finally, I include my work as a waitron, because that is where I learned to deal with clients and figure out what they want and how to keep them satisfied.

EDUCATION

Bellville THS, Cape Town, South Africa

I also studied both electrical and computer systems engineering but finished neither because my passion was really coding. I then completed a Web Development Bootcamp run by Salesian's Life Choices where I received a certificate and I continue to learn through my job and doing online courses.

COMMUNICATION

At Salesian's Life Choices I did not only learn to code but also how to communicate as they taught us life skills and we also done professional development.

LEADERSHIP

I have been hailed as a leader many times as I am always prepared to take responsibility and I am always looking to grow. I also received an award for helping my fellow students improve on their marks and have taught extra classes as I am also looking to help others grow as well.
